TITLE 3—THE PRESIDENT PROCLAMATION 2723

NATIONAL FARM SAFETY WEEK, 1947
BY THE PRESIDENT OF THE UNITED STATES
OF AMERICA
A PROCLAMATION

WHEREAS more fatal accidents occur in agriculture than in any other occupation; and

WHEREAS the increasing complexity of modern farm operations creates additional accident hazards; and

WHEREAS caution and intelligent effort on the part of every farm family in the land will lessen the suffering and economic loss caused by accidents, and the coordinated observance by all our people of a week dedicated to farm safety will effect an immense saving to our country:

NOW THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby call upon the Nation to observe the week commencing July 20, 1947 as National Farm Safety Week, as a spearhead to a year-round farm safety program, and I request all persons and organizations concerned with agriculture and farm life to cooperate in the observance of this fourth annual National Farm Safety Week. I also urge farm people everywhere to set aside a specific time during National Farm Safety Week for family discussions of methods for the prevention of accidents, in order that these producers of the Nation's food may live and work with greater safety.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 2nd day of April in the year of our Lord nineteen hundred and forty-[SEAL] seven, and of the Independence of the United States of America the one hundred and seventy-first.

HARRY S. TRUMAN

By the President:

DEAN ACHESON,

TITLE 17—COMMODITY AND SECURITIES EXCHANGES

Chapter I—Commodity Exchange Authority (Including Commodity Exchange Commission)

[Hearing Docket CE-P 6]

PART 150—ORDERS OF THE COMMODITY EXCHANGE COMMISSION

REDUCTION OF LIMITS ON POSITION AND DAILY TRADING IN COTTON FOR FUTURE DELIVERY

Findings of fact. Pursuant to the provisions of section 4a of the Commodity Exchange Act (7 U. S. C. 6a), the Commodity Exchange Commission, after investigation and full consideration of the record made at a public hearing held in Washington, D. C., December 10, 1946, of which due public notice had been given and at which all persons were given opportunity to hear, present, refute, and comment on evidence in the premises, does hereby find:

(a) Trading in cotton for future delivery, on or subject to the rules of a contract market, by a person who holds or controls a speculative net position of more than 30,000 bales, long or short, in any one future or in all futures combined in cotton, on or subject to the rules of such contract market, tends to cause sudden or unreasonable fluctuations or changes in the price of cotton not warranted by changes in the conditions of supply or demand;

(b) The present limit of 30,000 bales in any one cotton future is a reasonable limit on the daily speculative purchases or sales which any person may make on any one contract market.

Conclusions. Upon the foregoing facts, it is concluded that in order to prevent excessive speculation in cotton futures which will cause sudden, unreasonable, or unwarranted fluctuations or changes in price resulting in an undue and unnecessary burden on interstate commerce in cotton, it is necessary to reduce the present limit on the net long or net short speculative position which any person may hold or control under contracts of sale of cotton for future delivery on or subject to the rules of contract markets; that 30,000 bales is a reasonable limit on the net long or net short speculative position which any person may hold or control in any one future or in all futures combined in cotton on or subject to the rules of any contract market; and that it is unnecessary to make any change in the present limit on the daily speculative purchases or sales of cotton futures which any person may make on any one contract market.

Order. Section 150.2 (a) of the order of the Commodity Exchange Commission, promulgated August 26, 1940 (17 CFR, Cum. Supp., § 150.2 (a)) is amended, effective May 10, 1947, to read as follows:

§ 150.2 *Limits on position and daily trading in cotton for future delivery.*

(a) *Position limit.* The limit on the maximum net long or net short position which any person may hold or control

in cotton on any one contract market is 30,000 bales in any one future or in all futures combined.

Issued this 2d day of April 1947.

SURPLUS PROPERTY TO ASSIST IN THE CONTROL OF FOOT-AND-MOUTH DISEASE

Section 16 (b) of the Surplus Property Act as amended confers authority upon the Administrator to set aside quantities and types of surplus property, except real property, which he determines to be appropriate for exclusive disposal to

PROPOSED RULE MAKING

TREASURY DEPARTMENT

Bureau of Internal Revenue

126 CFR, Part 1901

RATIFICATION OF SPIRITS AND WINES

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury. Prior to the final adoption of such regulations, consideration will be given to any data, views, or arguments pertaining thereto which are submitted in writing in duplicate to the Commissioner of Internal Revenue, Washington 25, D. C., within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. The proposed regulations are to be issued under the authority of sections 2800 (a) (5) 2801 (e) (1) 2861, 3040, 3176, and 3250 (1) of the Internal Revenue Code (26 U. S. C. A. 2800, 2801, 2861, 3040, 3176 and 3250).

1. Regulations 15 (Part 190, 26 CFR) as amended, are hereby amended in these respects:

(a) Section 190.9a is added; and

(b) Sections 190.42, 190.153, 190.203, 190.279, 190.280, 190.281, 190.414, and 190.416 are amended, as follows:

§ 190.9a *Limitation on use of alcoholic flavoring materials.* The use of alcoholic flavors or flavoring extracts manufactured on premises other than a rectifying plant must be limited by the rectifier so that the quantity of alcohol (proof gallons) contained therein will not represent more than $2\frac{1}{2}$ percent of the quantity of alcohol (proof gallons) contained in the finished product. For example, 100 gallons of a finished cordial, 50 degrees of proof, contain 50 proof gallons. As $2\frac{1}{2}$ percent of 50 equals 1.25, the cordial could contain not more than 1.25 proof gallons of alcohol derived from such flavors or flavoring extracts used in its manufacture. The manufacture of rectified products under formulas providing for the use of alcoholic flavors or flavoring extracts to an extent not consistent herewith shall be discontinued within sixty days after the effective date of this regulation. New formulas submitted for the purpose of showing the use of alcoholic flavors or flavoring extracts in the manufacture of rectified products must furnish the information required by § 190.153, as amended. (Sec. 3250 (1) I. R. C.)

§ 190.42 *Stills.* All stills in the rectifying plant shall be located in the rectifying room and shall be of substantial construction and must have a clear space of not less than one foot around them. Every still must have plainly and legibly painted thereon words indicating its use, or uses, as "gin still," "cordial still," "water still," etc., followed by its serial

number and capacity in wine gallons. Stills shall be connected with the receiving tanks by continuous, permanent metal pipe lines. If the gin still is equipped with a pipe line to by-pass the berry basket, such pipe line must be equipped with a valve for locking with a Government lock.

§ 190.153 (a) *Flavoring materials.* Formulas providing for the use of alcoholic flavors or flavoring extracts under the provisions of § 190.9a, in addition to showing the kind of and percentage (by volume) of such material used, must specify the percentage of alcohol (by volume) contained therein.

§ 190.203 *Production.* Gin may be produced exempt from the rectifying tax, by the redistillation of a pure spirit over juniper berries and other aromatics. Gin so produced must be run into a receiving tank from which it must be promptly (a) drawn into packages, gauged, stamped, and removed to the finished products room or (b) transferred to a bottling tank, gauged, and (1) bottled and removed to the finished products room or (2) conveyed by pipe line to a contiguous tax-paid bottling house or rectifying plant for bottling. (See §§ 190.313 to 190.339) (Sec. 2800 (a) (5) I. R. C.)

§ 190.279 *Determining proof of sweetened spirits, wines, etc.* The alcoholic content (a) of blended whiskies containing more than 0.6 gram or 600 milligrams of solids per 100 milliliters derived from blending materials such as sherry wine, prune juice, caramel, glycerine, etc., and (b) of wines, cordials, liqueurs, and other rectified products containing saccharine or other solid matter will be determined by the use of an approved ebulliometer or a small laboratory still, provided by the rectifier in accordance with §§ 190.313 to 190.331, inclusive. When using such instruments rectifiers must follow closely the instructions furnished therewith, in order that accurate determinations may be made. Instructions relative to the use of small laboratory stills (or wine sets) and the following ebulliometers: Arnaldo-Sala (with shield), Braun, Juerst, Lefco, L'Ebulliometer Levesque (with shield) Malligand (with shield), Salleron-Dujardin, "TAG" (with shield), and E. B. Torino (with shield) are also set forth in the appendix to Regulations 7, Wine—1945 (26 CFR, Part 178). The alcoholic content of blended spirits containing not more than 0.6 gram or 600 milligrams of solids per 100 milliliters derived from blending materials will be determined by the use of a standard hydrometer or a small still. If determined by a standard hydrometer an obscuration correction factor may be added to the apparent proof in order to obtain the true proof of the blended spirits. Experience has shown that 0.1 gram or 100 milligrams of solids per 100 milliliters will obscure the true proof 0.4 of 1° of proof. For example, if a blended whisky contains 0.25 gram or 250 milligrams of solids per 100 milliliters

and the apparent proof corrected to 60° Fahrenheit is found to be 89° proof by a standard hydrometer, a correction factor of 1° of proof (2.5 times 0.4) due to the solids may be added to the apparent proof, hence the true proof would be 90°. The solids in blended spirits due to blending materials will be determined by evaporating 25 milliliters of the blended spirits in a weighed dish on a steam bath and then heating for 30 minutes at the temperature of boiling water in a drying oven. The solids thus determined, multiplied by 4, will give the solids in 100 milliliters of blended spirits. The correction factor to be used then will be determined on the basis that every 100 milligrams of solids will obscure the proof 0.4 of 1° of proof. The ebulliometer should not be used in determining the alcoholic content of blended spirits containing not more than 0.6 gram or 600 milligrams of solids per 100 milliliters. (Sec. 2861, I. R. C.)

§ 190.280 *Determining contents by weight.* Rectified spirits containing not more than 0.6 gram or 600 milligrams of saccharine or other solid matter per 100 milliliters which are transferred to portable packages or to a bottling tank mounted on scales may be gauged by weight in accordance with the official Gauging Manual. To this end accurate scales must be provided. Government officers will frequently test, by means of the test weights provided in accordance with § 190.32, the accuracy of the scales used for weighing packages. Scales used for weighing spirits in lots of not over 500 gallons in bottling tanks will be tested from time to time under the supervision of the storekeeper-gauger by means of the test weights provided in accordance with § 190.32. Such scales will be tested by placing the prescribed test weights upon the scales and checking the weight registered on the beam of the scales. The test weights will then be removed without disturbing the beam and the bottling tank filled with spirits or water to the same weight, whereupon the test weights will again be placed upon the scales, the spirits or water being retained in the tank, and the weight registered on the beam checked. This operation will then be continued until the scales have been checked in 500-pound notches at all weights for which the scales are used. Rectifiers will have scales used for weighing spirits in larger lots tested and their accuracy certified by State, county, or city departments of weights and measures at intervals of not more than six months. The storekeeper-gauger will not permit the use of any scales not so tested or which upon testing are found to be inaccurate. (Sec. 2861, I. R. C.)

§ 190.281 *Determining contents by measure.* Rectified spirits transferred to a bottling tank not mounted on scales, and spirits, wines, cordials, liqueurs, and other rectified products containing saccharine and other solid matter will be gauged by measure to determine the

wine-gallon content (corrected to volume in accordance with Table 7 of the Gauging Manual) the proof-gallon content will then be determined by multiplying the wine-gallon content by the proof (pointed off in two decimal places) of the spirits. If the spirits, wines, cordial, liqueurs, and other rectified products containing saccharine or other solid matter are transferred to packages, the capacity of each package must be ascertained before the liquors are placed therein, or the quantity to be placed in each package must first be ascertained by actual measure in another vessel provided for that purpose: *Provided, however* That the quantity in wine gallons of any liquor placed in packages may be determined by weight if the specific gravity of the liquor is ascertained and used in calculating the volume. (Sec. 2861, I. R. C.)

§ 190.414 *Packages of distilled spirits.* In addition to the serial number, there

shall be plainly and durably burned, cut, imprinted, or stencilled, on the Government head of each barrel or similar container of distilled spirits (a) the kind of spirits; (b) the wine gallon content; (c) the proof of the spirits; (d) the proof gallon content; (e) the tare of the container; (f) the date of filling; (g) the number of the approved formula under which rectified; (h) the name (or trade name or style) of the rectifier; (i) the location (city or town, and State) of the rectifying plant; and (j) the number of the rectifier's basic permit issued under the Federal Alcohol Administration Act: *Provided*, That if the spirits were rectified by such rectifier, or if the spirits are unrectified spirits which were produced by such rectifier at a distillery, he may use in connection with his name the designation "Rectifier" or "Distiller," respectively. (Sec. 2861, I. R. C.)

§ 190.416 *Packages and cases of wine.* The rectifier shall place marks upon

packages and cases of wine similar to the marks required by §§ 190.414 and 190.415 to be placed upon packages and cases of distilled spirits, except: The tare need not be marked on the packages; the alcoholic content of the wine will be shown in percentage by volume in lieu of the proof; and, in the case of unrectified wine, the proof gallons may be omitted. (Sec. 3040, I. R. C.)

2. This Treasury decision shall be effective on the 31st day after the date of its publication in the FEDERAL REGISTER.
